Monsoon Moments

World Photography Day exhibition, organised by the students of Photography club Jawahar Lal Nehru Govt. college of fine art, Shimla. This year's theme, "Monsoon," captures the essence of one of nature's most powerful and evocative season.

In this exhibition Photography club of Jawahar Lal Nehru Govt. college of fine art, Shimla celebrates the mesmerising beauty of the monsoon, a season that transforms landscapes and evokes a spectrum of emotions. Through the lens, students captured the rhythm of the rain, the lush greenery, and the play of light and shadow that define the monsoon. Each photograph invites you to experience the intimacy of the season—its serenity, vibrancy, and the unique atmosphere it creates. As you journey through these photographs, we invite you to reflect on the profound impact photography has on how we perceive the world. Through these monsoon moments, we celebrate not only the season but also the enduring power of photography to capture the essence of our shared human experience.

Why We Celebrate World Photography Day

World Photography Day, celebrated on August 19th, marks the invention of the daguerreotype, a photographic process developed by Louis Daguerre in 1839, which laid the foundation for modern photography. This day honours the art, science, and history of photography, recognising its impact on society by allowing us to capture moments, document reality, and express our creativity. For aspiring photographers and artists, it is a day to appreciate the power of images and to reflect on how photography can shape our understanding of the world.
